Goliad Clay Thk and Hydraulic Gradient Details West to East June 13-2012.pdf

Goliad Up Gradient Wells June 13-2012.pdf

Dear Bill,

Attached are the remaining files further detailing the Goliad clay thicknesses by sand throughout the entire area of review, and hydraulic gradient supporting the directionality of water flow from West to East.

I'd like to propose that we follow up with a call on Monday afternoon after your review of the information to conclude any lingering questions... Hopefully we can finalize everything over a phone call negating the need to meet in Austin Wednesday morning.. But if that is what is needed, we are prepared to sit down with TECQ and EPA at that time.

Thank you, and have a good weekend..
